

Flooding Action Plan

Dulcinea

Crew Orientation:

- *Review Location of Thru Hulls and practice closing them*
- *Locate Disaster Bag and go over contents*
 - *Collision Matt*
 - *Covers for Hatches and Ports*
- *Review Pumps Bilge 1, Bilge 2, Manual Cockpit, & Manual Disaster Bag.*
- *Sound Bilge Alarms to experience Sound*

At the first sign of WATER or BILGE Alarm Sounding.....

- Crew member SOUNDS ALARM
- Taste Water to determine if Salty (Ocean) or Fresh (Tank Leak)
- Start the Engine
- Close all Thru Hulls
- Determine location of WATER breach
- Assess means to stem the flow
- Abandon Ship Risk Assessment
 - If INFLOW can be controlled? Then continue offensively fighting the Breach
 - If INFLOW can't be controlled? Then divide up and one crew continues pumping while others prepare to Abandon Ship.
- Watch Keeper stay on Watch
